Art Unit: 2142

1. Claims 1-56 are presented for examination.
2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
3. The applicant should use this period for response to thoroughly and very closely proof read and review the whole of the application for correct correlation between reference numerals in the textual portion of the Specification and Drawings along with any minor spelling errors, general typographical errors, accuracy, assurance of proper use for Trademarks <sup>TM</sup>, and other legal symbols ®, where required, and clarity of meaning in the Specification, Drawings, and specifically the claims (i.e., insert "of" in claim 1 (line 8) prior to "the"). Minor typographical errors could render a Patent unenforceable and so the applicant is strongly encouraged to aid in this endeavor.
4. The following is a quotation of the second paragraph of 35 U.S.C 112:

**The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.**

5. Claims 1-56 are rejected under 35 U.S.C 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which the applicant regards as the invention. The scope of meaning of the following claim language is not clear:

- a) "the invariants"--claim 1 (line 7);
- b) "the object itself"—claim 15 (line 8);
- c) "the object in a third party object"—claim 15 (line 9);
- d) "the deserialization process" – claim 21 (lines 10-11) and claim 42 (line 9);
- e) "the serialization information" – claim 25 (line 10)[(note lines 5 and 7 of claim 25) which "serialization information" is "the serialization information"?];
- f) "the class"—claim 25 (last two lines)[suggest adding "type" at the end of the claim];
- g) "the deserialization"—claim 34 (line 10)[note lines 6 "objects can be deserialized" and line 9 "deserialization of an object"];
- h) "The architecture of claim 21" – claim 39 (line 1)[claim 21 is a system];
- i) "this serialization information" – claim 40 (lines 10-11)[(note lines 7 and 9 of claim 40) which "serialization information" is "this serialization information"?];
- j) "the object" – claim 45 (line 4);
- k) "the pluggable formatter" – claim 55 (lines 7-8).

6. As to 5 (a-k) above, these are but a few examples of numerous cases where clear antecedent bases are lacking and not an exhausting recital. Any other term(s) or phrase(s) over looked by examiner and not listed above which start with either "the" or

Art Unit: 2142

"said" and do not have a single proper antecedent bases also is indefinite for the reasons outlined in this paragraph. Also, these are but a few examples where term(s) or phrase(s) are introduced more than once without adequate use of either "the" or "said" for the subsequent use of the term(s) or phrase(s). Moreover, multiple introduction of a term, or changes in tense, results in a lack of clear antecedent bases for term(s) or phrase(s) which relied upon the introduced term. Failure to correct all existing cases where clear antecedent bases are lacking can be viewed as non-responsive.

7. The claims are allowable over the art of record since the art of record failed to teach or remotely suggest the invention as currently defined by the claims.

8. A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) days from the data of this letter. Failure to respond within the period for response will cause the application to become abandoned (see MPEP 710.02, 710.02(b)).
